

# EMPLOYEE ASSESSMENT & QUALIFICATION

Whether your employees are just starting or coming back from injury, Christie Clinic's Department of Occupational Health Services provides everything your company needs to get them ready for work.

## Post-Offer/Pre-Placement Examinations

Administering employee pre-placement and post-offer examinations helps create profile templates that categorize key aspects of employees' health and their physical abilities. This information then becomes part of patients' permanent records and can be used to evaluate future injuries or illnesses.

At Christie Clinic, we thoroughly evaluate individuals' levels of general health, including their cardiovascular and neuro-muscular conditions. In addition, we also provide strength testing, a process that analyzes employees' isometric strength performance to calculate safe lifting levels in various work postures.

- *Forklift physicals*
- *Pre-placement and post-offer examinations*
- *Strength testing*
- *Audiograms*
- *FAA pilot license physicals*
- *DOT examinations*
- *Return-to-work examinations*
- *Fitness-for-duty physicals*
- *Transitional duty assignments*

## FAA Pilot License Examinations and DOT Examinations

Before your employees take to the skies, send them to Christie's Department of Occupational Health Services. We provide physical examinations required by the Federal Aviation Administration and the Department of Transportation.

## Fitness and Return-to-Work Evaluations

Our testing services address the needs of employees in many different settings. We help evaluate employees' ability to perform physically demanding tasks by conducting a variety of specific medical examinations.

Our fitness evaluations are beneficial to all employees, including those who work in positions that are not physically strenuous. These assessments offer an affordable means to measure employees' overall readiness for work and can be particularly helpful for employees who have experienced a non-occupational accident or illness.
