

LOSS PREVENTION

At Christie Clinic's Department of Occupational Health Services, we believe in stopping problems before they begin. That's why we're dedicated to helping companies ensure safe, effective work environments that will maximize employee performance and minimize potential injuries. Because when your employees are happy and healthy, they're able to perform their best.

Independent Medical Evaluations

Christie Clinic offers independent medical evaluations. These services are performed by our specialized physicians and may be requested for insurance and legal purposes.

If your employee requires a specialized evaluation, Christie professionals in orthopaedics, physical medicine, neurology, otolaryngology, and other relevant departments are able to perform comprehensive patient assessments as well.

- ***Audiograms***
- ***Drug screening***
- ***Breath alcohol testing***

Drug Screening

In addition to medical evaluations, we also provide drug screenings for all occupations. Collection-only services are available to employers with private lab contracts. Our medical review officers offer private consultations to individuals requiring specific attention.

For companies seeking quick, immediate employee testing, our Department of Occupational Health Services offers instant drug screening. This convenient process allows us to obtain and release screening results to employers within just 15 minutes of the test. This option is particularly valuable to companies that hire temporary or short-term employees who don't fall under federal or state requirements.
