

Our laboratory services are available at Christie on University Monday through Friday from 7:30am to 5:30 pm. Our Christie on Windsor laboratory services are available Monday through Friday from 7:00am to 5:30 pm and also on Saturday from 8:00am to 12:00noon.

For your convenience, our satellites are available for most standard laboratory needs.

All specimens are prepared and then sent by courier each day to our main laboratory for processing. The trips to and from the clinics vary for each location, as do the types of tests ordered by your provider. This can affect whether some of your needs can be met at the satellite locations. If you arrive after our courier leaves the clinic, the specimens will not be taken to our lab for testing until the following business day at the regular courier run.

There are instances when we request that lab blood draws and certain tests be performed at either of the Champaign locations, University or Windsor. Examples of these instances may include:

- Need for unusual processing or supplies
- Tests require a short turn around time for scheduled procedures (within 24 hours)
- Tests which are not routine

All satellite services are available at Christie Clinic in Mahomet, Tuscola, Rantoul, Urbana on Windsor Rd, and at our Danville locations—Logan and Vermilion. The available hours are:

8:00am to 12:00noon and from 1:00pm to 4:00pm Monday through Friday

**Please be aware that on Friday afternoons, some specimens might not be drawn since they would be compromised if they have to sit over the weekend.**

\* Each location has a different time of day when the Clinic's courier stops by and this may alter the location best suited for the testing you need.

**No appointments are necessary.** However, you may wish to call each office to see when the best time for those services are for those locations to avoid as much wait time for yourself.

### PATIENT GUIDELINES for Laboratory Blood Draws

- If you are going to have blood work that requires fasting, the results will be most accurate if these guidelines are followed:
  - For Lipid Profile, Cholesterol, Triglycerides, High Density Lipoprotein, fast for 14 hours prior to testing.
  - For all other fasting tests, fast for 10 hours prior to testing.
- You may drink water during the fasting period, but should have nothing else to eat or drink
- Continue to take your medications during this time **unless** otherwise instructed.
- Your lab orders will be sent electronically to the lab unless otherwise instructed.
- If you do not receive your test results within two weeks, please call your provider's office.
