

## Seeking Healthy Adult Volunteers for New Clinical Study Opportunity

We are recruiting participants **age 40 or older** who are due for **or** scheduled for a screening colonoscopy to take part in a clinical study that may determine if a new screening test can accurately and reliably detect colorectal cancer and pre-cancer.

### Who can participate?

We are looking for healthy volunteers who meet the following requirements:

- Generally healthy condition
- No history of colorectal cancer or other gastrointestinal conditions such as inflammatory bowel disease, ulcerative colitis or Crohn's disease
- Have not had a colonoscopy within the previous 9 years.

Enrollment will begin in September 2020 and includes a single clinic visit to assess full eligibility to participate (with optional blood draw), collection of a stool sample at home, and routine screening colonoscopy as per standard of care. Additional information can be found on [www.ClinicalTrials.gov](http://www.ClinicalTrials.gov).

**Participants will be compensated for their time.**

Please contact the Christie Clinic Department of Clinical Research for an appointment at 217-366-5647 or [research@christieclinic.com](mailto:research@christieclinic.com). **Hurry, spots are limited and will fill up fast!**
