OSF, Libby Allison, Media Relations Coordinator, (309) 308-5015

For release on March 26, 2020

Champaign County Healthcare COVID-19 Daily Briefing

Champaign, Ill.— Under the leadership of the Champaign County Emergency Operations Center (EOC), area healthcare organizations will be providing weekday media briefings.

The number of persons diagnosed with COVID-19 in Illinois continues to rise. As of today, there are ten confirmed cases in Champaign County.

Because community transmission is occurring in multiple locations throughout the state, we all should consider ourselves at risk for exposure to COVID-19. That means that everyone should stay home as much as possible and self-monitor for symptoms. Self-monitoring means checking yourself daily for fever, cough, shortness of breath or a sore throat. Health officials do not indicate testing for mildly ill or asymptomatic people.

Virtual Communication Resources for Patients and Families

These are stressful and confusing times and we've had to make some tough decisions of limiting visitors and support persons while our patients are in our facilities. These tools/apps can help you stay in touch with your loved ones when you can't physically be by their side. Staying connected supports the healing process by overcoming geographical boundaries, and times when visitors are not possible.

Encourage spreading cheer to others with sidewalk chalk games, scavenger hunts (find a house with black shutters, etc.), count the [insert item of the day: shamrock, flower, dog, etc.] in the windows, the Hearts for Healthcare Hunt. Consider organizing virtual happy hours and birthday "parties."

Available on Computer, Android and iOS

(Google Play for Android and Apple App Store for iOS)
