

Meet Your Radiation Oncologist

Steven Damore, MD

I strive to treat patients with the most up to date treatment methods. This requires a commitment to keeping up with the medical literature, and, in the field of radiation oncology, using the latest technology, to implement innovations that make cancer treatment safer and more effective. I want patients to feel confident that they are receiving the highest quality care.

Why I Chose Health Care

"I became a Radiation Oncologist because I enjoy the challenges inherent in the treatment of cancer, and because the treatment patients receive can make such a difference in their lives, especially when it is delivered with respect, care, and compassion. For me, the most important part of being a doctor is the interaction with patients and their families and helping them as they go through their journey."

Residency

University of California, Irvine, CA, Radiation Oncology Residency Program

Internship

St. Mary's Medical Center, San Francisco, CA

MD

Washington University School of Medicine, St. Louis, MO

Education

Biology, UCLA, Los Angeles, CA
