

# Meet Your Nurse Practitioner

## Stephanie “Sky” Green, APRN, FPA

### Why I Chose Health Care

I had an experience as a younger adult which required medical care. I was inspired by the nurses and doctors competency and compassion, and I knew I wanted to provide that to somebody in need when I grew up.

### Education

Master of Science in Nursing/Family Nurse Practitioner, Purdue University, West Lafayette, IN

Nursing & Bio-Chemistry, Indiana University School of Nursing and Purdue University of Indianapolis, Indianapolis, IN

### Training

Post graduate fellowship in Endocrinology

### Professional Memberships

American Association of Nurse Practitioners,  
American Association of Critical Care Nurses, Endocrine Society

### Department of Endocrinology

In the Department of Endocrinology, Sky specializes in diabetes management, thyroid nodules and disorders, pituitary disorders and bone health for adults. All adult endocrinopathies including management of type 1 and 2 diabetes.

*I am a wife and mother of four children and two beloved Siamese cats. As a family, we enjoy traveling together. I am also a fitness instructor and enjoy staying physically active.*

*I have always been drawn to Endocrinology since I entered healthcare. I'm fascinated by how it orchestrates all the other systems in the body through hormonal signaling.*
