

Meet Your Physical Therapist

Samantha Herriott, PT, DPT

Why I Chose Health Care

"I always knew I wanted to be a part of the medical field. When I was younger, my grandfather was diagnosed with cancer; he became very weak and was referred to physical therapy. I saw how this physical therapist provided my grandfather with compassionate care while helping him return to more normal, everyday function. This appealed to me, and I knew I wanted to do something where I would be able to help people reach a goal and improve their way of life."

Medical School

Doctor of Physical Therapy, Washington University in St. Louis, MO

Education

Bachelor of Science, Eastern Illinois University

Certification

CPR

Department of Physical Therapy

In the Department of Physical Therapy, Samantha provides comprehensive care for patients who require treatment in all phases of physical therapy. She provides preventative injury and education, conditioning, and training, as well as treatment and rehabilitation.

My husband, Matt, and I spend many nights at the ballpark or school watching our children's events. When we are not there, we enjoy outdoor activities as a family including camping and hiking. You'll also find us on the farm or volunteering in our community.

I treat my patients with the respect that I would want in return. They come to me with a problem and goals that are unique to only that one patient. I believe each patient is an individual with his/her own story, and each patient should feel they are receiving individualized, compassionate care from a trustworthy and knowledgeable professional that relates to them on many levels. I listen to my patients' concerns so that I can problem solve and work as a team with the patient to help him/her gain full function.

CHRISTIE CLINIC

We listen. We care.
